WORK EXPERIENCE

Aeven Philippines
Advanced Cloud Engineer
May 2024 - Present

Roles & Responsibilities:
- Provision, configure, and maintain Azure Kubernetes Service (AKS) clusters.
- Troubleshoot and resolve issues related to AKS clusters using Azure Monitor, Grafana, and Kibana.
- Implement CI/CD pipelines for automated deployment and updates of containerized applications.
- Set up monitoring and logging solutions for AWS EKS using CLoudWatch / Prometheus.

Grundfos IS Philippines
Cloud Engineer
May 2023 - May 2024

Roles & Responsibilities:
- Container Orchestration: Enable deployment and operation of applications in OpenShift.
- OpenShift Management: Install, upgrade, patch, and monitor the OpenShift Container Platform.
- Azure API Management: Manage API instances, create APIs, operations, and products for developers.
- Infrastructure (DNS): Maintain public and internal DNS entries.

SAS Institute Philippines
Associate Technical Consultant
January 2021 – May 2023

- Deployed SAS software packages for SIT, UAT, and Production environments in compliance with IFRS17 standards.
- Managed testing, validation, and documentation processes for deployment phases.
- Created and updated software packages and scripts (SAS Base, Macros, RGF, IRM) to support implementation teams.
- Utilized Infrastructure-As-Code principles (Terraform), AWS services (EC2), Kubernetes, Docker, Linux, Jenkins, Git, Python, and Bash scripting.
